SUMMARY

Aspiring AI/ML Engineer and Full-Stack Developer with hands-on experience in Python, Django, React, and the MERN stack, passionate about building intelligent, scalable web applications powered by Large Language Models (LLMs) and Generative AI. Experienced in developing REST APIs, integrating AI models, and building real-world projects using RAG, vector databases, and modern backend technologies

WORK EXPERIENCE

Intern – Mira-Bhayandar Municipal Corporation (MBMC)

Swachh Survekshan Programme

March 2023 - Feb 2024

- On the digital front, I managed official communication channels and developed awareness campaigns using Canva and Figma. focused on structured documentation, digital reporting, and visual storytelling to enhance public engagement.
 - Analyzed solid waste management workflows and participated in structured field data collection with the Ward Sanitary Inspector to identify sanitation vulnerability points based on official evaluation metrics.
 - Worked on the operational and digital aspects of urban sanitation governance.
-

EDUCATION

Master of Science in Computer Science

University of Mumbai | CGPA: 8/10

June 2026 - Present

Bachelor of Science in Computer Science

Shankar Narayan College | CGPA: 6.76/10

June 2022 - April 2025

Hsc (Science Stream)

St. Joseph's Jr. College | Percentage: 74.33%

June 2022 - April 2025

TECHNICAL SKILLS

- **Full-Stack Development:** MERN Stack , Django
 - **Programming Languages:** JavaScript, Python, Core Java
 - **Web Development & UI/UX:** HTML5, CSS3, Tailwind CSS.
 - **Database & API Management:** SQL, MongoDB , REST APIs Integration & Development.
 - **Core Concepts:** Object-Oriented Programming, Excel, Soft Skills ,Gen AI Models .
 - **Version Control & Collaboration:** Git, GitHub, Postman , Vercel
-

PROJECTS

Portfolio

The newest iteration of my personal website. Built with Vite and React 19, leveraging Material UI v6 and GitHub grain API integration.

July-2025

Rail-Sathi

developed a ticket booking application inspired by the UTS (Unreserved Ticketing System). The application allows users to register, log in securely, search for routes, book tickets, and view their booking history. The project follows a MERN architecture with RESTful APIs and JWT-based authentication

January-2026

AI Resume Analyzer & Interview Preparation Platform

Developed a full-stack AI-powered Resume Analyzer using React, Django REST Framework, ChromaDB, and LLMs. Implemented RAG, PDF parsing, vector embeddings, ATS scoring, semantic resume search, AI interview question generation, and an interactive chatbot.

February-2026

CERTIFICATES

Full-Stack Web Development & Java Programming

SDAC Mumbai | **CRN:** E3CAGCNB

2024-2025
